# DIPLOMA

Bachelor of Engineering in Software Technology

Interactive Media

Georgiana Ion

Civil registration number: 190301-7976

Date of completion: 24-01-2024

Harald E. Mikkelsen, Rector

Transcript of records

Subjects	ECTS credits	ECTS scale	Grade
Algorithms and Data Structures	5	B	10
Android Development	5	C	7
Bachelor project preparation	5	A	12
Calculus	5	A	12
Computer Architecture and Organization	5	C	7
Data Analytics Infrastructure	5	B	10
Database Systems	5	D	4
Digital Multi Media	5	B	10
Net-programming	5	B	10
Embedded Software, C-programming and RTOS	5	B	10
Game Development	5	B	10
Innovation	5		Passed
Interaction Design	5	B	10
Circular economy & LCA	5	B	10
Mathematics for Software Engineering	5	D	4
Networking and Security	5	E	02
Responsive Web Design	5	B	10
Semester project 1	5	E	02
Semester project 2	10	C	7
Semester project 3	10	E	02
Semester project 4	5	B	10
Semester project 6	10	B	10
Single-Page Web Applications	5	B	10
Software Development of Distributed Systems	5	E	02
Software Development with UML and Java 1	10	D	4
Software Development with UML and Java 2	10	B	10
Software Engineering	5	C	7
Study Skills for Engineering Students	5		Passed

Internship	ECTS credits	ECTS scale	Grade
Internship	30		Passed

Bachelor Project	ECTS credits	ECTS scale	Grade
Bachelor project	15	A	12

Title: Telescope

Internationalisation	Semester	Start date	End date
Romania	5	15-07-2022	15-01-2023

The study programme has been completed in accordance with ministerial order no. 2674 of 28/12/2021 on Professional Bachelor Programmes in Engineering. The programme's prescribed period of study is equivalent to 210 ECTS. The name of the study programme is Software Technology Engineering and gives the graduate the title Bachelor of Engineering in Software Technology.

Diplomas from Danish University Colleges

Diplomas from Danish University Colleges are issued digitally in .pdf format only. We do this to save the world's limited resources and, not least, to save our graduates the challenges they would face should they lose a hard copy of the diploma.

The graduates can forward the diploma to third parties or download the diploma to their own storage devices as well as send it as an attachment to an email or through digital recruitment systems when applying for jobs.

Verification of the authenticity of the digital diploma

On the diplomas there is a link to a verification database and a verification ID. Through this database, you can upload the digital diploma received from one of our graduates and enter the verification ID as stated on the diploma.

Our database will then search and compare with the diploma just uploaded; thereby verifying whether the uploaded version is identical to the VIA-issued diploma as well as the diploma's authenticity.
